

ARCHIO Dashboard — QClay Working Checklist

Use this document for meetings, Figma planning, and progress tracking.

The full functionality and rationale live in `qclay-dashboard-page-inventory-master.md`.

Status key

- **A — Retain:** substantial product already exists; refine it.
- **B — Redesign:** existing page is useful but requires new architecture/hierarchy.
- **C — Prototype:** useful modules exist but not a coherent final page.
- **D — New:** design from zero.

Non-negotiable product structure

1. Flight Deck
2. Community
3. Decision Desk
4. Trading DNA
5. The Marketplace
6. Portfolio
7. Net Worth
8. AI Verified Track Record
9. Social Network

Flight Deck is the persistent workspace. Other systems open as a peek panel, focused overlay, or deep-work page. **Archio AI is available everywhere.** The verified record is the data spine beneath every locked decision.

1. Shared shell — design first

- ☐ Top context/navigation bar
 - ☐ Persistent Ask Archio entry
 - ☐ Center working-object area
 - ☐ Contextual right action/execution rail
 - ☐ Footer utility dock and left slide-in panels
 - ☐ Customizable lower module zone
 - ☐ Peek panel behavior
 - ☐ Focused overlay behavior
 - ☐ Deep-work page behavior
 - ☐ Notification center
 - ☐ Data freshness / sync state
 - ☐ Read-only vs execution-enabled state
 - ☐ Public/private visibility language
 - ☐ Verified/linked/inferred/imported/self-reported provenance
 - ☐ Loading, empty, disconnected, error, permission, locked and dispute states
-

2. Complete official page list

01 — Flight Deck

Page	Status	What QClay needs to do	Priority
Flight Deck Workspace	B	Redesign existing dashboard around permanent chart center, right execution rail, top navigation, footer dock and customizable modules	MVP
Morning Brief	C	Create personal five-line start-of-day brief with direct source actions	MVP
Workspace Customizer	C	Design drag/resize/module library/save/version/publish-safe preview	Design now; build later
Account & Execution Center	C	Consolidate accounts, order ticket, rules, contract, fees and impact	MVP simulation/manual; execution later
Notifications & Interventions	C	Unify market alerts, rule interventions, room updates and sync errors	MVP-lite
Archio AI Expanded Workspace	C	Merge Copilot/Intelligence concepts into one contextual AI surface	MVP

02 — Community

Page	Status	What QClay needs to do	Priority
Community Discovery	A	Refine existing filters/cards; add fit reason, access and verified host hierarchy	MVP
Community Detail / Preview	B	Rebuild inspector into a clear public decision page before joining	MVP
Live Room	C	Canonical stage, chat/timeline, pinned thesis, locked calls, room AI and permissions	MVP
Catch Me Up	D	New source-linked summary overlay available before and during a room	MVP
Room Memory / Library	C	Search sessions, transcript, thesis, lessons, files and source timestamps	Post-MVP
Mentor Studio / Management	D	Community creation, tiers, sessions, AI review, moderation and earnings	Post-MVP
Student Progress	C	Goals, curriculum, sessions, forecasts, mentor feedback and earned proof	Future

03 — Decision Desk

Page	Status	What QClay needs to do	Priority
Decision Desk Home	B	Expand Forecast Hub into full decision workflow and attention queue	MVP
Create Forecast / Market Read	A	Retain form; add source thesis, chart, evidence, privacy and lock preview	MVP
Forecast Detail / Resolution	C	Show locked original, updates, outcome, AI verdict and audit references	MVP
Decision Builder	D	New trade / no-trade / simulate decision page	MVP
Pre-Trade Contract	D	New locked entry/invalidation/target/size/exit commitment	MVP differentiator
Active Decisions & Contracts	D	Monitor upcoming, active, breached, expired and complete decisions	MVP-lite
Auto-Journal / Entry Detail	C	Create canonical entry from forecast, contract, execution and reflection	MVP
Daily / Weekly Review	C	Score decision quality separately from outcome	MVP / next
Autopsy Replay	D	Replay instructive failure and convert lesson into rule	Post-MVP

04 — Trading DNA

Page	Status	What QClay needs to do	Priority
Trading DNA Overview	C	Unify edge, risks, rules, calibration, triggers and confidence	Next after MVP
Mind Check	D	Contextual evidence-based intervention at dangerous moments	First DNA release
Rules & Playbook	C	Active/experimental/retired rules and explicit override history	Post-MVP
Pattern Explorer	C	Filter patterns and always link conclusions to evidence	Post-MVP
Cold Streak Protocol	D	Temporary protection mode with size cap, paper mode and support	Post-MVP
Shadow Mode / Compatibility	D	Compare user decisions against mentor calls before risking capital	Future
DNA Evolution	D	Show how style, edge and risks change over time	Future

05 — The Marketplace

Page	Status	What QClay needs to do	Priority
Marketplace Discovery	C	New canonical marketplace for agents and workspace layouts	Post-MVP
Agent Listing Detail	D	Purpose, proof, sources, permissions, sample output, limitations and price	Post-MVP
Layout Listing Detail	D	Live preview, module map, compatibility, privacy and one-click install	Post-MVP
Installed Library	D	Manage installed agents/layouts, permissions, updates and billing	Post-MVP
Agent Builder / Training Studio	D	Select sources, test, cite, permission, version and publish	Future
Layout Publisher	C	Strip private data, preview, license, price and publish layout	Post-MVP
Creator Storefront / Earnings	D	Catalog, revenue, fees, refunds and payouts	Before monetization

06 — Portfolio

Page	Status	What QClay needs to do	Priority
Portfolio Overview	C	Consolidate accounts, wallets, positions, leverage, fees and risk	Post-MVP
Connections & Wallets	C	Connect/revoke/test/sync with explicit read vs trade permissions	Post-MVP foundation
Position Detail	D	Position history, contract, journal, liquidation, correlation and impact	Post-MVP
What If Scenario Lab	D	Natural-language stress test with cascades and ranked actions	Post-MVP
Pre-Trade Impact Preview	D	Inline effect of proposed trade on concentration and drawdown	Post-MVP
Transaction / Trade Activity	C	Unified event ledger with sync and journal linkage	Post-MVP

07 — Net Worth

Page	Status	What QClay needs to do	Priority
Net Worth Overview	D	Assets minus liabilities, source quality, history and change	Future

Exposure Map	D	Reveal life-level concentration across job, holdings and investments	Future
Runway Planner	D	Current and stressed survival horizon with visible assumptions	Future
Assets, Liabilities & Income	D	Connected/manual financial inventory; debt first-class	Future
Life What If	D	Model job loss, drawdown, large purchase and income change	Future

08 — AI Verified Track Record

Page	Status	What QClay needs to do	Priority
Private Record Center	C	Pending/resolved/disputed entries, metrics, provenance and visibility	MVP
Public Trader Passport	B	Redesign profile around proof while protecting private DNA/balances	MVP-lite
Record Entry / Audit Trail	D	Locked original, market data, AI verdict, sources and dispute history	MVP
Verification & KYC Center	C	Consent, status, vendor handoff, failed/review/appeal states	MVP planning
Permissions & Privacy	D	Object visibility, agent/data access, consent, revocation and export	MVP foundation
AI Verdict / Dispute Review	D	Explain verdict, confidence, source data and append-only resolution	Before public ranking
Proof-of-Skill Challenges	D	Free locked forecast challenges that build proof without capital	Post-MVP

09 — Social Network

Page	Status	What QClay needs to do	Priority
Proof Feed	C	Verified-consistency feed with living charts and record plates	Future
Post Composer	D	Text, chart, forecast, room clip, autopsy and product post types	Future
Post Detail / Discussion	D	Interactive source object, discussion summary and attribution	Future
Following & Discovery	C	People, rooms, companies, agents and transparent recommendations	Future

Autopsy Post	D	Privacy-safe shared loss/lesson artifact tied to record	Future
Company / Institution Profile	D	Verified entity, claims, content, products and public records	Future
Messages & Collaboration	D	Permissioned messaging with shareable financial objects	Future

3. Essential non-system pages

- ☐ Authentication — **A** — retain and restyle
- ☐ Progressive onboarding — **C** — role, markets, goals, connections, privacy and first forecast
- ☐ Integration Center — **C** — connections, permissions and sync health
- ☐ Settings — **D** — account, security, notifications, appearance, privacy, AI, data and accessibility
- ☐ Plans / Billing / Subscriptions — **D**
- ☐ Creator Earnings / Payouts — **D**
- ☐ Support / Safety / Disputes — **D**
- ☐ Admin / Moderation — **D**

4. MVP clickable journey QClay should prototype

1. ☐ User opens **Morning Brief**.
2. ☐ Opens affected instrument in **Flight Deck** without losing context.
3. ☐ Asks **Archio AI** to mark a level on the chart.
4. ☐ Opens a **Community Live Room** in a slide-in/overlay.
5. ☐ Uses **Catch Me Up** and selects a source thesis.
6. ☐ Converts thesis into **Create Forecast** with attribution.
7. ☐ Locks the forecast.
8. ☐ Uses **Decision Builder** and signs a **Pre-Trade Contract**.
9. ☐ Simulates or records execution.
10. ☐ Receives an **Auto-Journal** entry.
11. ☐ Completes **Trade Review**.
12. ☐ Sees the locked event in **Private Record Center**.
13. ☐ Opens the privacy-safe result on **Public Trader Passport**.

This journey is the minimum proof that the dashboard is a connected system rather than a collection of pages.

5. Required object transfers

- ☐ Community thesis → Decision Desk forecast with source attribution
- ☐ Locked forecast/contract → Track Record
- ☐ Decision → Portfolio execution/simulation
- ☐ Execution/outcome → Journal
- ☐ Journal evidence → Trading DNA

- ☐ Trading DNA intervention → Flight Deck
- ☐ Flight Deck layout → Marketplace publisher
- ☐ Marketplace install → Flight Deck or Archio AI
- ☐ Portfolio data → Net Worth
- ☐ Public proof plate → Community, Marketplace and Social
- ☐ Social chart/thesis → user's attributed Decision Desk forecast

Every completed transfer needs explicit feedback such as **"Forecast locked and added to your record."**

6. Current route cleanup

Retain / transform

- `/dashboard` → Flight Deck
- `/forecast` → Decision Desk
- `/communities` → Community
- `/profile` → Public Trader Passport + private account/profile settings
- `/history` → Journal / Portfolio Activity / Record events
- `/welcome` → Progressive onboarding
- Authentication routes → retain and restyle

Merge into official systems

- `/intelligence` + `/copilot` → Archio AI
- `/nexus` → Social Network concepts
- `/hub` → Community library/student progress
- `/cockpit` → Flight Deck concepts

Internal only

- `/pitch`
 - `/newpitch`
 - `/masterplan`
 - `/design`
 - `/docs/ultra-breakdown`
 - `/playground/glass-demo`
 - `/playground/glass-popup`
-

7. Open product decisions required from ARCHIO

QClay should flag these rather than invent policy:

- ☐ Brokers/exchanges/wallets and permissions supported at launch
- ☐ TradingView/data licensing and available chart actions
- ☐ KYC vendor, jurisdictions and age restrictions
- ☐ AI verdict/scoring methodology and dispute policy
- ☐ Public metrics and minimum sample sizes

- ☐ Marketplace pricing, platform fees, trials, refunds and prohibited claims
 - ☐ Community subscriptions, moderation and refunds
 - ☐ Data retention/deletion by jurisdiction
 - ☐ Exact live/beta/waitlist status for each system
-

8. Recommended Figma sequence

1. ☐ Shared shell and system navigation
2. ☐ Shared object/status components
3. ☐ Flight Deck Workspace
4. ☐ Morning Brief and Archio AI
5. ☐ Decision Desk end-to-end
6. ☐ Track Record and Trader Passport
7. ☐ Community Discovery, Detail, Live Room and Catch Me Up
8. ☐ MVP clickable prototype
9. ☐ Trading DNA / Mind Check
10. ☐ Portfolio / Connections / What If
11. ☐ Marketplace
12. ☐ Social Network and Net Worth

Handoff acceptance

- ☐ Priority 0–2 pages have desktop designs and responsive intent
- ☐ Peek/overlay/deep-work transitions demonstrated
- ☐ Full daily loop clickable
- ☐ Empty/error/permission/lock/dispute states covered
- ☐ Private/public and evidence provenance unmistakable
- ☐ Components and tokens documented
- ☐ Future functionality honestly labeled
- ☐ Open dependencies listed for founder/engineering decisions
